## Pre Cleaner and Cleaner PLZ-7M and PLZ-14M

The Pre Cleaner and Cleaner, models PLZ-7M and PLZ-14M, are the equipment for cereal milling process, these machines clean the grains and prepare the raw material for the following processes, increasing the efficiency and the quality.

Due to the aspiration system composed by a chamber and a centrifugal fan which separate effectively the lighter impurities.

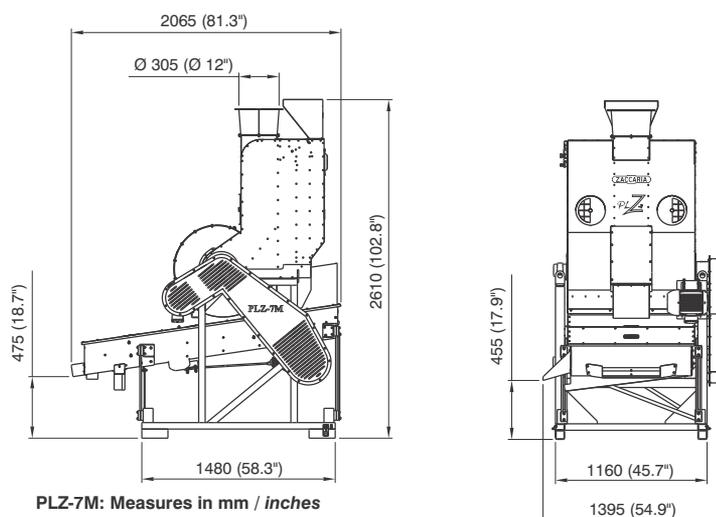

The separation of the heaviest impurities happens through two sieves, removing the big and small impurities.

Load and transportation lifts for cleaned products optional supplied.

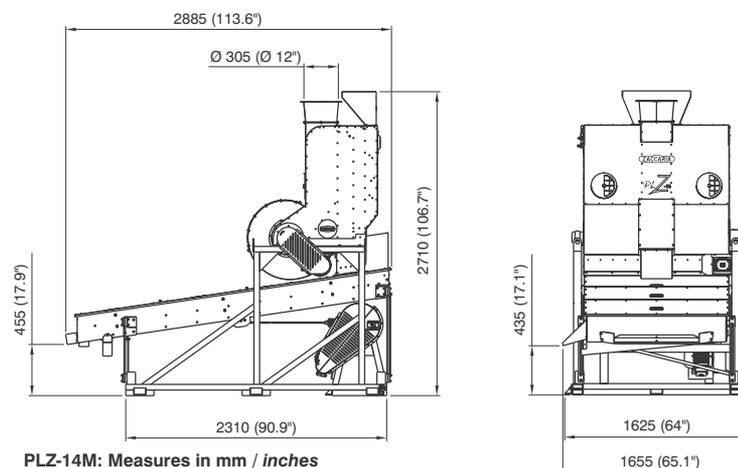

The fixing sieves screens are supplied totally in stainless steel.

## TECHNICAL FEATURES

- Fast change system of the sieve screens (using the inserting system)
- "Drawer system" for assembly and disassembly the sieves screens (removed by the rear part of the machine), simplifying the change
- Support spring made of fiberglass
