Whiteness Meter MBZ-2

The Zaccaria Whiteness Meter model MBZ-2, is it used for production quality control and the standardization the level of whitening during the milling process. By measuring the grain whiteness, transparency and polishing. It's a basic and essential equipment for the rice millings.

Modern and compact, the MBZ-2 bring some advantages to rice process control and standardization laboratories, such as:

- Equipment set-up and operation by a touch screen display
- It allows more set-up and diagnosis options
- Calculation of average using up to 10 consecutive measurements and is capable of storage of more than 1000 measurements or identified averages per sampling point into its memory
- It has an internal clock which allows to save the sample measurements on time
- It has a PC communication interface to transfer the memory stored measurements to generate reports

FEATURES

- 4.3" LCD touch screen display
- Storage memory up to 1024 measurements
- PC communication interface
- PC data transfer software
- Whiteness, transparency and polishing level measurement

Items included in the package:

- MBZ-2 whiteness meter
- MBZ-2 plastic cover
- Sample carrier case
- Sample carrier (2)
- Calibration standards (2) with case
- PC communication cable
- Power source
