Sieve for Cereal Cleaning PLZ

Zaccaria has renovated its lines of Sieves for Cleaning to offer to the grain processing industries the best optimization about the time and production to reach the most demanding and diversified markets.

The models PLZ-M have exclusive system to execute the quick change of sieves, reducing the stopping time. For companies, which process several types of grains, this feature provides the best optimization of the change time of the sieves, once there are several holes configurations, and it depends on the cereal to be processed (*under consult).

For all the PLZ-M models, the sieves frames are built in stainless steel and they have the easy fit-in system.

The PLZ-M models have the cleaning section closed, not allowing the contact of the cleaning chamber to the environment, providing the cleanest product, reaching the highest quality standards.

- Models PLZ-1M and PLZ-2M - Painted steel
- Models PLZi-1M and PLZi-2M - Stainless steel
