# CCRZ

**Model:**

**CCRZ**

**Power / poles:**

- Each cylinder (MCCRZ)  
0,33 hp (0,25 kW)  
1500 rpm (50 Hz)  
1800 rpm (60 Hz)

- MTVZ - Vibratory conveyor unit  
0,75 hp (0,55 kW)  
1000 rpm (50 Hz)  
1200 rpm (60 Hz)

**Inlet capacity (kg/h):**

- To separate red rice  
Up to 1.800 (per cylinder)
- To separate immature grain and rice tips  
Up to 1.500 (per cylinder)
- To separate impurities larger than the screen perforation size  
Up to 2.500 (per cylinder)
- The work capacity of the vibratory Conveyor MTVZ is up to 10.800 kg/h.
- To classify maize and bean, the individual cylinder capacity is up to 1.000 kg/h.
- For other applications, under consult.

## Thickness/Width Grader CCRZ

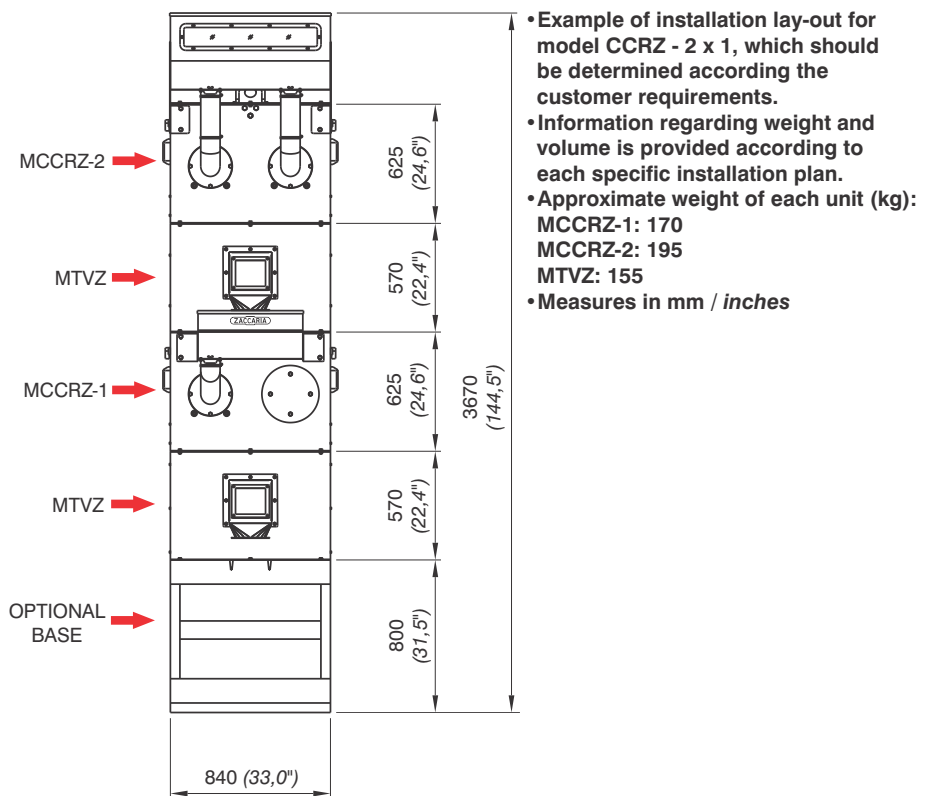

The equipment was developed to classify granular products, considering their thickness. The sorting cylinder can be offered with different holes sizes (round or oblong) depending on the grain.

The modular installation system allows several configurations, being able to separate more than one product.

For all models, Zaccaria provides CCRZ to reach better performance and meet the needs of our customers.

**TECHNICAL FEATURES**

- Cylindrical screens provide the easiest replacement
- Exclusive and efficient auto-cleaning system by rubber rolls prevent screen slots from clogging
- Cylindrical screens are made of stainless steel sheet and work in the horizontal position
- Product discharge is done by a separate module equipped with a vibratory chute or screw conveyor

EXPERIENCE THAT MAKES THE DIFFERENCE

Obs: - Production capacity in kg/h is based in tests made from Brazilian long rice type;  
 - The rice moisture recommended to obtain the maximum yield is between 12% to 13% (B.U.).  
 - Equipment originally supplied with motor
